

Parental Survey about Careers Education

Green Park School works to prepare students for the world of work after leaving school, college or at some point in the future. Throughout time at school young people will learn about the skills needed for work, talk about different jobs, visit work places or speak to people who have different jobs and do some volunteering and work experience when possible. Information about our careers programme can be found on our website underneath the tab Preparation For Adulthood.

Please can you help us with feedback about the programme and planning for the future by answering this short survey?
